Special Issue: Toxicology and Sustainable Development—Meeting the Challenge
Proceedings of the IXth International Congress of Toxicology, Brisbane, Australia, July 8–12, 2001

Guest Editor: P.F.A. Wright

Preface
P.F.A. Wright (Australia) 1–2

Lectures

Deichmann Lecture
Apoptosis and toxicology—what relevance?
D.L. Vaux (Australia). 3–7

Plenary Lectures
Fundamentals of prion biology and diseases
S.J. DeArmond, E. Bouzamondo (USA) 9–16
Food and cancer
T. Sugimura (Japan) 17–21

Debate

Low level exposures to organophosphorus esters may cause neurotoxicity
G.A. Jamal, S. Hansen, P.O.O. Julu (UK). 23–33

Symposia

Symposium 1. Hepatocarcinoma in humans: What are the risks to come?
Epidemiology of hepatocellular carcinoma
M.C. Kew (South Africa) 35–38
The natural history of hepatocellular carcinoma
R. Romeo, M. Colombo (Italy) 39–42
Molecular pathogenesis of human hepatocellular carcinoma
X.W. Wang, S.P. Hussain, T.-I. Huo, C.-G. Wu, M. Forgues, L.J. Hofseth, C. Brechot, C.C. Harris (USA, France) 43–47

Symposium 2. Autoimmune reactions and environmental exposures
Modes of presentation of chemical neoantigens to the immune system
W.J. Pichler (Switzerland) 49–54

CONTENTS direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **http://contentsdirect.elsevier.com**

The danger hypothesis—potential role in idiosyncratic drug reactions
M. Pirmohamed, D.J. Naisbitt, F. Gordon, B.K. Park (UK) 55–63
Environmental chemicals and autoimmune disease: cause and effect
E.V. Hess (USA) 65–70
Ultraviolet radiation and autoimmune disease: insights from epidemiological research
A.-L. Ponsonby, A. McMichael, I. van der Mei (Australia) 71–78

Symposium 3. The role of diet in human cancer
Natural and human-made mutagens and carcinogens in the human diet
L.R. Ferguson (New Zealand) 79–82
Novel markers of susceptibility to carcinogens in diet: associations with colorectal cancer
C. Sweeney, B.F. Coles, S. Nowell, N.P. Lang, F.F. Kadlubar (USA) 83–87
Diet and prostate cancer
T. Shirai, M. Asamoto, S. Takahashi, K. Imaida (Japan) 89–94
A cytogenetic footprint for mammary carcinomas induced by PhIP in rats
A.T. Christian (USA) 95–97

Symposium 4. Adverse drug reaction reporting scheme: What have we learnt and where do we go from here?
The role of the Australian Adverse Drug Reactions Advisory Committee (ADRAC) in monitoring drug safety
I.W. Boyd (Australia) 99–102
Developing a pharmacovigilance system in the Philippines, a country of diverse culture and strong traditional medicine background
K. Hartigan-Go (Philippines) 103–107

Symposium 5. Scientific and societal issues in risk assessment
Introduction—risk from a philosophy of science point of view
T. Malmfors, H. Rosing (Sweden, Finland) 109–113
Guidelines for application of chemical-specific adjustment factors in dose/concentration–response assessment
M.E. Meek, A. Renwick, E. Ohanian, M. Dourson, B. Lake, B.D. Naumann, V. Vu (Canada, UK, USA) . 115–120
Development and implementation of the IPCS conceptual framework for evaluating mode of action of chemical carcinogens
E. Dybing (Norway) 121–125
The relationship between risk analysis and the precautionary principle
J. Morris (UK) 127–130

Symposium 6. Transcription factors and cancer
Transcription factors and cancer: an overview
D.W. Nebert (USA) 131–141
Effect of ARA9 on dioxin receptor mediated transcription
M.J. Lees, M.L. Whitelaw (Australia) 143–146

Symposium 7. Impact of endocrine disrupting chemicals on eco-system and human health: mechanisms and risk assessment
Estrogenic effects in fish in The Netherlands: some preliminary results
A.D. Vethaak, J. Lahr, R.V. Kuiper, G.C.M. Grinwis, T.R. Rankouhi, J.P. Giesy, A. Gerritsen (The Netherlands, USA) 147–150
Affinity of the alligator estrogen receptor for serum pesticide contaminants
L.J. Guillette Jr., P.M. Vonier, J.A. McLachlan (USA) 151–154
Reproductive failure and endocrine disruption by organohalogens in fish-eating birds
A.T.C. Bosveld, M. van den Berg (The Netherlands) 155–159
PCB-induced neurodevelopmental toxicity in human infants and its potential mediation by endocrine dysfunction
G. Winneke, J. Walkowiak, H. Lilienthal (Germany) 161–165

Symposium 8. Nuclear receptor activation and cross-talk with cell cycle regulation
PPARα and the regulation of cell division and apoptosis
R.A. Roberts, S. Chevalier, S.C. Hasmall, N.H. James, S.C. Cosulich, N. Macdonald (France, UK) 167–170
Role of the aryl hydrocarbon receptor in cell cycle regulation
A. Puga, J. Marlowe, S. Barnes, C.-y. Chang, A. Maier, Z. Tan, J.K. Kerzee, X. Chang, M. Strobeck, E.S. Knudsen (USA) 171–177
Cell cycle control by the thyroid hormone in neuroblastoma cells
S. Garcia-Silva, G. Perez-Juste, A. Aranda (Spain) 179–182

Symposium 9. Ecological risk assessment as a tool for sustainable development
Assessment of persistent and bioaccumulating chemicals in the aquatic environment
D. Calamari (Italy) 183–186
Hazard and risk assessment of chemicals for terrestrial ecosystems
J.V. Tarazona, M.M. Vega (Spain) 187–191
Ecological risk assessment of persistent organic pollutants in the arctic
J.U. Skaare, H.J. Larsen, E. Lie, A. Bernhoft, A.E. Derocher, R. Norstrom, E. Ropstad, N.F. Lunn, Ø. Wiig (Norway, Canada) 193–197

Symposium 10. Regulation of cytochrome P450 gene expression
Receptor-dependent regulation of the CYP3A4 gene
G.G. Gibson, W. El-Sankary, N.J. Plant (UK) 199–202
Regulation of P450 4A expression by peroxisome proliferator activated receptors
E.F. Johnson, M.-H. Hsu, U. Savas, K.J. Griffin (USA) 203–206
Mechanisms of cytochrome P450 regulation by inflammatory mediators
E.T. Morgan, T. Li-Masters, P.-Y. Cheng (USA) 207–210

Symposium 11. Human effects of chronic arsenic poisoning
Mechanisms of arsenic biotransformation
M. Vahter (Sweden) 211–217

Symposium 12. Oxidative stress
Oxy radicals, lipid peroxidation and DNA damage
L.J. Marnett (USA) 219–222
Biological reactivity and biomarkers of the neutrophil oxidant, hypochlorous acid
C.C. Winterbourn (New Zealand) 223–227
Aldehyde-sequestering drugs: tools for studying protein damage by lipid peroxidation products
P.C. Burcham, L.M. Kaminskas, F.R. Fontaine, D.R. Petersen, S.M. Pyke (Australia, USA) 229–236

Symposium 13. Transgenic models in toxicology
Transgenic models in xenobiotic metabolism and toxicology
F.J. Gonzalez (USA) 237–239
Evaluation on carcinogenicity of chemicals using transgenic mice
K. Mitsumori (Japan) 241–244

Symposium 14. Neurotoxicity and neurodegeneration
Promotion of organophosphate induced delayed polyneuropathy by certain esterase inhibitors
M. Lotti (Italy) 245–248
Insights into a basis for incomplete inhibition by botulinum toxin A of Ca^{2+}-evoked exocytosis from permeabilised chromaffin cells
G.W. Lawrence, P. Foran, J.O. Dolly (UK) 249–253

Workshops

Workshop 1. Cell lines and recombinant enzymes as tools in toxicology
Genetically-engineered bacteria expressing human enzymes and their use in the study of mutagens and mutagenesis
P.D. Josephy (Canada) 255–260
Use of heterologously-expressed cytochrome P450 and glutathione transferase enzymes in toxicity assays
F.P. Guengerich, J.B. Wheeler, Y.-J. Chun, D. Kim, T. Shimada, P. Aryal, Y. Oda, E.M.J. Gillam (USA, Japan, Australia) 261–264
Modeling the metabolic competency of glutathione *S*-transferases using genetically modified cell lines
A.J. Townsend, S.L. Kabler, J. Doehmer, C.S. Morrow (USA, Germany) 265–269

Workshop 2. Risk assessment–an update
Incorporating mechanistic data into risk assessment
L.D. Lehman-McKeeman (USA) 271–274
The use of biologically based modeling in risk assessment
R.B. Conolly (USA) 275–279
EU risk assessment: science and policy
S.J. Munn, B.G. Hansen (Italy) 281–285

Workshop 3. Toxicological implications of xenobiotic transporters
Toxicological implications of hepatobiliary transporters
Y. Kato, H. Suzuki, Y. Sugiyama (Japan) 287–290
Transporters and xenobiotic disposition
R.B. Kim (USA). 291–297
Genetically determined differences in P-glycoprotein function: implications for disease risk
M.F. Fromm (Germany) 299–303

Workshop 4. Respiratory allergy: Paradoxes and controversies
Respiratory allergy: what are the uncertainties?
M.H. Karol (USA) 305–310
Chemical respiratory allergy: role of IgE antibody and relevance of route of exposure
I. Kimber, R.J. Dearman (UK) 311–315
Pollution, environmental factors and childhood respiratory allergic disease
T. Nicolai (Germany) 317–321
Influences on the development of allergy and asthma
D.B. Peden (USA). 323–328

Workshop 5. Assessing health risks of hazardous air pollutants
Setting ambient air quality standards for particulate matter
R.O. McClellan (USA) 329–347
Health effects of diesel exhaust emissions—a mixture of air pollutants of worldwide concern
J. Kagawa (Japan). 349–353
A European perspective on hazardous air pollutants
F.X.R. van Leeuwen (The Netherlands) 355–359
Evaluating hazardous air pollutants in Australia
A.L. Hinwood, P.N. Di Marco (Australia) 361–366

Workshop 6. impact of endocrine disrupting chemicals on human and ecosystem health—testing strategies
Hazard identification and risk assessment of endocrine disrupting chemicals with regard to developmental effects
A. Mantovani (Italy) 367–370
Xenoendocrine disrupters-tiered screening and testing: Filling key data gaps
L.E. Gray Jr., J. Ostby, V. Wilson, C. Lambright, K. Bobseine, P. Hartig, A. Hotchkiss, C. Wolf, J. Furr, M. Price, L. Parks, R.L. Cooper, T.E. Stoker, S.C. Laws, S.J. Degitz, K.M. Jensen, M.D. Kahl, J.J. Korte, E.A. Makynen, J.E. Tietge, G.T. Ankley (USA) 371–382
Ecological risk assessment and testing for endocrine disruption in the aquatic environment
T.H. Hutchinson, D.B. Pickford (UK) 383–387
Scientific issues associated with the validation of in vitro and in vivo methods for assessing endocrine disrupting chemicals
J. Ashby (UK). 389–397

Workshop 7. Linking epidemiology and toxicology for better human risk assessment
Environmental epidemiology: Basics and proof of cause–effect
D.L. Weed (USA). 399–403
Case studies in the use of toxicological measures in epidemiological studies
M. Sim (Australia) 405–409
Biomarkers of genetic damage for cancer epidemiology
M. Fenech (Australia) 411–416

Workshop 8. Food regulatory toxicology
Current developments in food additive toxicology in the USA
D.G. Hattan, L.S. Kahl (USA) 417–420
Safety assessment of genetically modified crops
K.T. Atherton (UK) 421–426
Substantial equivalence—an appropriate paradigm for the safety assessment of genetically modified foods?
H.A. Kuiper, G.A. Kleter, H.P.J.M. Noteborn, E.J. Kok (The Netherlands). 427–431

Workshop 9. Toxins of marine and freshwater origin
Recent advances in the study of epigenetic effects induced by the phycotoxin okadaic acid
E.E. Creppy, A. Traoré, I. Baudrimont, M. Cascante, M.-R. Carratú (France, Spain, Italy). 433–439

Human intoxication by microcystins during renal dialysis treatment in Caruaru—Brazil
S.M.F.O. Azevedo, W.W. Carmichael, E.M. Jochimsen, K.L. Rinehart, S. Lau, G.R. Shaw, G.K. Eaglesham (Brazil, USA, Australia) 441–446

Workshop 10. Polymorphisms of xenobiotic metabolising enzymes—toxicological significance
Polymorphism of cytochrome P450 and xenobiotic toxicity
M. Ingelman-Sundberg (Sweden) 447–452
Genetic polymorphisms of UDP-glucuronosyltransferases and their functional significance
J.O. Miners, R.A. McKinnon, P.I. Mackenzie (Australia) 453–456
The relationship between polymorphisms of xenobiotic metabolizing enzymes and susceptibility to cancer
P. Vineis (Italy) 457–462
Genomics and the prediction of xenobiotic toxicity
U.-A. Meyer, J. Gut (Switzerland) 463–466

Workshop 11. Risk assessment and risk management for mining in developing countries
Separating potential source exposure from background exposure in subsistence populations in developing countries
J.S. Tsuji, S. Robinson (USA) 467–470

Workshop 12. Role of apoptosis in toxicology
History of the events leading to the formulation of the apoptosis concept
J.F.R. Kerr (Australia) 471–474
Cell cycle checkpoint signaling: Cell cycle arrest versus apoptosis
J.A. Pietenpol, Z.A. Stewart (USA) 475–481
Upregulation of FasL and apoptosis in thymic lymphomas in *Atm* knock-in mice
M.F. Lavin, K. Spring (Australia) 483–489
Role of mitochondria in toxic cell death
J.D. Robertson, S. Orrenius (Sweden) 491–496

Workshop 13. Developments in ecotoxicology and links with human toxicology
Issues at the interface between ecology and toxicology
L.S. McCarty (Canada) 497–503
Mining in the Alligator Rivers Region, northern Australia: assessing potential and actual effects on ecosystem and human health
R.A. van Dam, C.L. Humphrey, P. Martin (Australia) 505–515
Biomarkers in toxicology versus ecological risk assessment
C. Eason, K. O'Halloran (New Zealand) 517–521
Sodium monofluoroacetate (1080) risk assessment and risk communication
C. Eason (New Zealand) 523–530
Toxicology tests with aquatic animals need to consider the trophic transfer of metals
N.S. Fisher, S.E. Hook (USA) 531–536

Workshop 14. Toxicogenomics and proteomics
Identifying toxic mechanisms using DNA microarrays: evidence that an experimental inhibitor of cell adhesion molecule expression signals through the aryl hydrocarbon nuclear receptor
J.F. Waring, R. Gum, D. Morfitt, R.A. Jolly, R. Ciurlionis, M. Heindel, L. Gallenberg, B. Buratto, R.G. Ulrich (USA) 537–550
Custom cDNA microarrays; technologies and applications
W.D. Pennie (UK) 551–554
Genomic interrogation of mechanism(s) underlying cellular responses to toxicants
R.P. Amin, H.K. Hamadeh, P.R. Bushel, L. Bennett, C.A. Afshari, R.S. Paules (USA) 555–564

Workshop 15. Safety assessment of traditional herbal medicines: benefits and risks
The regulation of herbal medicines in Australia
D.R. Briggs (Australia) 565–570
Clinical and laboratory investigations in herbal poisonings
J.-F. Deng (Taiwan) 571–576
Renal interstitial fibrosis and urothelial carcinoma associated with the use of a Chinese herb (*Aristolochia fangchi*)
J.L. Nortier, J.L. Vanherweghem (Belgium) 577–580
Regulation and quality control of herbal drugs in Korea
D.W. Choi, J.H. Kim, S.Y. Cho, D.H. Kim, S.Y. Chang (South Korea) 581–586

Additional abstracts of the IXth International Congress of Toxicology: Brisbane, Australia, July 8–12, 2001 . . 587–590
Author index 591–592
Keyword index 593–596
